

Organizer Internship

Replacing Cars with Community.

Our Goals and Vision

SpaceShare is a growing environmental partnership, using new technologies to help people share and save resources. Our long-term vision is to improve the way people use the existing travel infrastructure: if you get in your car alone, you should be able to find someone on your route and safely pick them up. We will make it much easier for people to live without cars.

Today, we make events greener: this year, we are providing environmental logistics for concerts, conferences, and festivals.

Volunteer Coordinator & Organizer Internship

Your role will quickly place you at a vital point near the center of our organization: you create a sense of community, you keep track of their projects, you make people happy to volunteer. You will be the main contact for new people finding out about SpaceShare. You'll work with our Project Manager to keep track of who is doing what, and who needs help. Our interns play a key role: no photocopy tasks, real responsibilities, real learning opportunities.

Who is this for

Perfect for a self-motivated, creative student interested in both organizing and green transportation. Be part of the environmental movement and make contacts in the field. An excellent first step for someone aiming for a career as volunteer manager and eventually as an executive director.

Other internships also available.
